- Architecture & Practices: DDD, Event-driven Architecture, Microservices, SOLID Principles, Clean Code.
- Testing: JUnit, Mockito.

## LANGUAGE

- English
- Spanish

## PROFESSIONAL SUMMARY

Senior Software Engineer with over 6 years of experience designing and delivering scalable and reliable software solutions. Specialized in Java, Spring Boot, Kafka, AWS, and microservices architecture. Currently a key member in the development of global invoicing systems supporting more than 500,000 daily transactions worldwide at Minsait (Indra). Strong team player known for fostering communication and cohesion, always ready to support teammates and focused on achieving shared objectives. Proven track record optimizing system performance, reducing operational costs, and implementing robust distributed systems.

## PROFESSIONAL EXPERIENCE

### Minsait – Seville, Client: Global Retail

2024 – Present

#### Senior Software Engineer

- Leading analysis, development, and testing a global invoicing platform, ensuring seamless handling of hundreds of thousands of daily transactions globally.
- Tech Stack: Java 21, Spring Boot, Kafka, DB2, PostgreSQL, MongoDB, JPA, OpenShift, GitHub Actions, Spring Cloud, JMS, AMQ, OpenAPI.
- Key responsibilities: Developing scalable microservices, optimizing performance, ensuring system reliability, and implementing CI/CD processes.

### Minsait – Seville, Client: Energy Sector

2022 – 2023

#### Software Analyst

- Developed and orchestrated batch processes and microservices using Domain-Driven Design (DDD) and an API-first approach.
- Tech Stack: Spring Boot, Java 17, Scala, Spark, Postgres, Docker, AWS, OpenAPI.
- Key responsibilities: Domain integrations, CI/CD pipeline management, deployments, server configuration, documentation, and preparation of user manuals.

## PROFESSIONAL EXPERIENCE

### Accenture, Client: Banking Sector

2021 - 2022

Analyst Programmer

- Full-stack development for banking applications including Angular frontends and Spring Boot microservices.
- Tech Stack: Angular 8/11, Java, Spring Boot, OracleDB, OpenShift, Redux.
- Key responsibilities: Frontend migrations, backend microservice development, mentoring junior developers, and managing technical support.

### Babel Sistemas de Información

2019 - 2021

Analyst Programmer

- Delivered solutions across multiple sectors (Banking, Energy, Telecom, Tourism).
- Tech Stack: Spring Boot, Angular, Jenkins (Groovy), Docker, MySQL.
- Key responsibilities: API development, frontend maintenance, CI/CD pipeline development, technical support, and documentation.

## CERTIFICATIONS

- Bachelor's in Software Engineering | University of Seville, Spain
- AWS Certified Solutions Architect Associate
- Certified Professional Scrum Master

## ABOUT ME

I enjoy learning new technologies on my own and taking on new challenges. Although not in a professional setting, I have developed several applications using React, Flutter, Supabase, and other tools. I'm passionate about continuous learning and building solutions that push me to grow as a developer.
