Professional Summary

Team Lead and Senior Backend Engineer with 6+ years of experience designing reliable backend systems, microservices and event-driven architectures. Specialized in Java, Spring Boot, Kafka, databases, CI/CD and cloud-native environments. Currently leading backend delivery for a global ecommerce invoicing and legal document generation platform supporting 500,000+ daily transactions worldwide. Strong production mindset, technical leadership, delivery ownership and practical interest in AI-enabled products and workflow automation.

Core Skills

- Backend and Architecture:** Java 21, Spring Boot, Kafka, Microservices, Spring Cloud, JPA/Hibernate, JMS, AMQ, OpenAPI, DDD, Event-driven Architecture, SOLID, Clean Code
- Cloud and DevOps:** OpenShift, AWS, Docker, GitHub Actions, Jenkins, Bamboo, CI/CD
- Databases:** DB2, PostgreSQL, MongoDB, OracleDB, MySQL, SQL Server
- Frontend and Product:** Next.js, React, TypeScript, Angular, Flutter, Tailwind CSS, Supabase
- AI and Automation:** n8n, GitHub Copilot, AI coding agents, LLM workflows, Embeddings, Semantic Search, RAG
- Testing and Delivery:** JUnit, Mockito, technical analysis, code review, mentoring, team coordination, Scrum

Professional Experience

Minsait

Team Lead / Senior Software Engineer | Client: Global Fashion Retail Company

- Lead backend delivery for a global ecommerce invoicing and legal document generation platform supporting 500,000+ daily transactions worldwide.
- Coordinate technical work within a development team, supporting teammates, reviewing solutions and maintaining delivery quality.
- Design and develop scalable backend services for tickets, invoices and country-specific fiscal/legal document workflows across international markets.
- Improve reliability, traceability, maintainability and performance in a business critical, high volume transactional environment.
- Collaborate with functional and technical stakeholders to analyse requirements and deliver production-ready solutions.

Tech stack: Java 21, Spring Boot, Kafka, DB2, PostgreSQL, MongoDB, JPA, OpenShift, GitHub Actions, Spring Cloud, JMS, AMQ, OpenAPI.

2024 - Present

Seville, Spain

Minsait

Software Analyst | Client: Energy Sector

- Developed microservices, orchestration workflows and batch processes for large-scale energy data management platforms.
- Applied DDD and API first practices to build maintainable backend integrations.
- Managed CI/CD pipelines, deployments, server configuration, documentation and user manual preparation.
- Worked across domain integrations, data processing and cloud-oriented delivery workflows.

Tech stack: Java 17, Spring Boot, Spring Batch, Scala, Spark, PostgreSQL, MongoDB, Docker, AWS, OpenAPI, Bamboo, Maven.

2022 - 2023

Seville, Spain

Accenture

Analyst Programmer | Client: Banking Sector

2021 - 2022

Seville, Spain

- Built and maintained Spring Boot microservices and Angular applications for transactional banking systems.
- Supported frontend migrations, backend development, bug fixing, automated testing and technical support.
- Mentored junior developers and helped improve delivery quality across backend and frontend workstreams.

Tech stack: Java, Spring Boot, Spring Cloud, Angular 8/11, TypeScript, OracleDB, DB2, OpenShift, Redux, Jenkins.

Babel Sistemas de Informacion

Analyst Programmer | Multiple sectors

2019 - 2021

Seville, Spain

- Delivered software solutions across banking, energy, telecom and tourism projects.
- Developed REST APIs, maintained frontend applications and contributed to CI/CD pipeline development.
- Provided technical support, documentation and server configuration for enterprise Java applications.

Tech stack: Java 8, J2EE, Spring Boot, Spring MVC, Hibernate, MySQL, SQL Server, OracleDB, Angular, Docker, Jenkins.

Selected Projects

Payload Pipeline Processor

React, TypeScript, Tailwind CSS

Developer tool for decoding, decompressing, decrypting and extracting data from complex integration payloads.

Watchdog

Next.js, TypeScript, Supabase

In-progress platform for lost-and-found pet listings, matching, messaging and location-based discovery.

Education and Certifications

Education

Bachelor's in Software Engineering, University of Seville, Spain (2015 - 2019)

Certifications

AWS Certified Solutions Architect - Associate; Certified Professional Scrum Master

Languages

Spanish: Native; English: Professional working proficiency
