

Miguel Luque Munoz

Team Lead / Senior Backend Engineer

Seville, Spain | +34 651 186 966 | miguel.luque.97@gmail.com | linkedin.com/in/miguel-luque-munoz-software-developer | github.com/MiguelLuque

PROFESSIONAL SUMMARY

Team Lead and Senior Backend Engineer with 6+ years of experience designing, building and maintaining reliable backend systems, microservices and event-driven architectures. Specialized in Java, Spring Boot, Kafka, databases, CI/CD and cloud-native environments. Currently leading backend delivery for a global ecommerce invoicing and legal document generation platform supporting 500,000+ daily transactions worldwide. Strong production mindset, technical leadership, delivery ownership and practical interest in AI-enabled products, workflow automation and developer productivity.

CORE SKILLS

Backend & Architecture: Java 21, Spring Boot, Kafka, Microservices, Spring Cloud, JPA/Hibernate, JMS, AMQ, OpenAPI,DDD, Event-driven Architecture, SOLID, Clean Code

Cloud & DevOps: OpenShift, AWS, Docker, GitHub Actions, Jenkins, Bamboo, CI/CD

Databases: DB2, PostgreSQL, MongoDB, OracleDB, MySQL, SQL Server

Frontend & Product: Next.js, React, TypeScript, Angular, Flutter, Tailwind CSS, Supabase

AI & Automation: n8n, GitHub Copilot, AI coding agents, LLM workflows, Embeddings, Semantic Search, RAG

Testing & Delivery: JUnit, Mockito, technical analysis, code review, mentoring, team coordination, Scrum

PROFESSIONAL EXPERIENCE

Minsait - Team Lead / Senior Software Engineer

Seville, Spain | Client: Global Fashion Retail Company | 2024 - Present

- Lead backend delivery for a global ecommerce invoicing and legal document generation platform supporting 500,000+ daily transactions worldwide.
- Coordinate technical work within a development team, supporting teammates, reviewing solutions and helping maintain delivery quality.
- Design and develop scalable backend services for tickets, invoices and country-specific fiscal/legal document workflows across international markets.
- Improve reliability, traceability, maintainability and performance in a business-critical, high-volume transactional environment.
- Collaborate with functional teams, technical stakeholders and client-side teams to analyse requirements and deliver robust production-ready solutions.

Tech stack: Java 21, Spring Boot, Kafka, DB2, PostgreSQL, MongoDB, JPA, OpenShift, GitHub Actions, Spring Cloud, JMS, AMQ, OpenAPI.

Minsait - Software Analyst

Seville, Spain | Client: Energy Sector | 2022 - 2023

- Developed microservices, orchestration workflows and batch processes for large-scale energy data management platforms.
- Applied Domain-Driven Design and API-first practices to build maintainable backend integrations.
- Managed CI/CD pipelines, deployments, server configuration, documentation and user manual preparation.

Tech stack: Java 17, Spring Boot, Spring Batch, Scala, Spark, PostgreSQL, MongoDB, Docker, AWS, OpenAPI, Bamboo, Maven.

Accenture - Analyst Programmer

Seville, Spain | Client: Banking Sector | 2021 - 2022

- Built and maintained Spring Boot microservices and Angular applications for transactional banking systems.
- Supported frontend migrations, backend development, bug fixing, automated testing and technical support.
- Mentored junior developers and helped improve delivery quality across backend and frontend workstreams.

Tech stack: Java, Spring Boot, Spring Cloud, Angular 8/11, TypeScript, OracleDB, DB2, OpenShift, Redux, Jenkins.

Babel Sistemas de Informacion - Analyst Programmer

Seville, Spain | Multiple sectors | 2019 - 2021

- Delivered software solutions across banking, energy, telecom and tourism projects.
- Developed REST APIs, maintained frontend applications and contributed to CI/CD pipeline development.
- Provided technical support, documentation and server configuration for enterprise Java applications.

Tech stack: Java 8, J2EE, Spring Boot, Spring MVC, Hibernate, MySQL, SQL Server, OracleDB, Angular, Docker, Jenkins.

SELECTED PROJECTS

Payload Pipeline Processor: Developer tool for decoding, decompressing, decrypting and extracting data from complex integration payloads. Built with React, TypeScript and Tailwind CSS.

Watchdog: In-progress platform for lost-and-found pet listings, matching, messaging and location-based discovery. Built with Next.js, TypeScript and Supabase.

EDUCATION & CERTIFICATIONS

Bachelor's in Software Engineering - University of Seville, Spain (2015 - 2019)

AWS Certified Solutions Architect - Associate | Certified Professional Scrum Master

Languages: Spanish native | English professional working proficiency
